

COULTERS

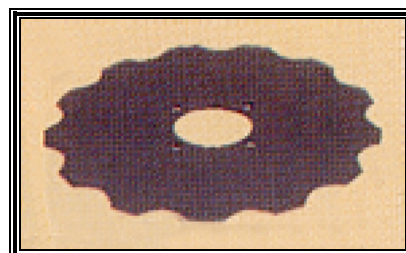

- 20" blade for deeper placement
- Down pressure and depth adjustment for your specific conditions.
- Longer hub bolt pattern for greater strength and stability.
- Cuts through residue, eliminating build-up and reducing implement draft.
- All components are heavy duty; they're built to last.
- Spring cushions the assembly to prevent damage from rocks and other obstructions.

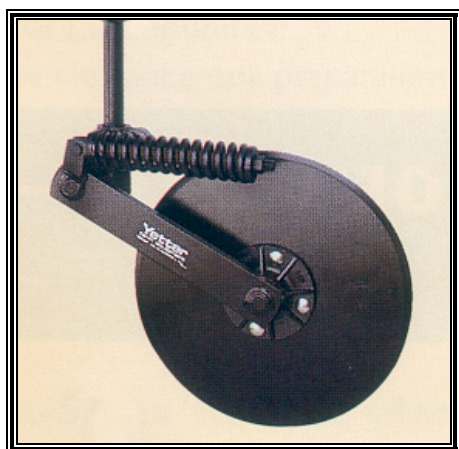

20" SMOOTH

20" RIPPLE

20" NOTCHED

GENERATION III

- Heavy-duty Generation III Coulters with exclusive poly spring insert supplements spring for maximum down pressure in tough field conditions.
- 22" blade
- Permits faster field speeds.
- 6" deflection increases range of travel.
